The Town of Groton Connecticut was given a \$4.5 million budget for the planning, design and construction of a multi-use athletic complex on the Merritt Parcel located on Groton Long Point Road.

This project included planning and design of new athletic fields, spectator seating, parking, landscaping, irrigation, fencing, drainage, and other related amenities. Stadia Engineering and Kent + Frost worked closely together throughout the entire design process to create an exciting and contextually sensitive plan that would celebrate the site's unique character.
